Technical Project Management | Construction Management | Contract Management

Certified Project Manager with 14+ years of cross-industry experience leading multi-million-dollar infrastructure, compliance, and digital transformation initiatives. Adept at Agile and Waterfall methodologies, system cutovers (SAP, SQL), and process automation. Strong background in telecom, utilities, federal contracting, and risk mitigation, including NIST/NERC-compliant programs. Proven ability to lead distributed teams, integrate cross-functional systems, and deliver measurable impact through operational efficiency, compliance, and client satisfaction.

Skill Areas

Leadership & Management: Emotional Intelligence, Employee Engagement, Teamwork, Motivating, Employee Development, Learning and Development, Professional Development, Planning, Critical Thinking, Strategic Thinking, Communication, Actionable Feedback, Active Listening, Collaboration, Interpersonal Skills, Process Improvement, Problem Solving, Strategy, Complex Problem Solving, Strategic Planning, Accountable, Best Practices

Project Management: Organization, Project Scoping, Resource Allocation, Budget and Cost Analysis, Scheduling Tools, Customer Service, Business Modeling

Technology: SAP, Power BI, SQL, Procore, Site Tracker, Microsoft Office Suite (Word, PowerPoint, Excel, Outlook)

PROFESSIONAL EXPERIENCE

SAC WIRELESS (MAY 2022 – MAR 2025)

Senior Project Manager, Transportation, Energy & Public Sector | WFH – Alabama

- Effectively engaged and communicated with seven (7) cross-functional teams country-wide to ensure accountability for construction, engineering, and geotechnical deliverables related to the (105) sites throughout the programs' duration.
- Routinely reported to executive leadership via PowerPoint decks on program status regarding site deliverables, engineering delays, environmental permit disclosures, budgetary risks and any other pertinent information.
- Effectually collaborated with customers and SAC management to define project scope, scheduling, cost, resource management, quality control, and deliverable completion.
- Leveraged Procore to evaluate work tasks, personnel assignments and deliverable status for program level management reporting.
- Aggressively drove one-hundred and five (105) sites within the private LTE utility development program (distribution, transmission and substation sites) based on priority and accurate status reports to ensure construction goal met – twenty-one (21) sites per year for five (5) years for a contract valued over \$5M. Large-scale project for one of the largest utility providers in California.
- Achieved project success by delegating responsibilities and tasks to the right people, resolving conflicts within the project team with empathy, and cultivating an empowering environment for open dialogue and creative processes.
- Routinely assessed inefficiency through process improvement (documented operating procedures), and automation (data exports, programming) to promote greater team efficiency and consistency.
- Efficiently communicated complex technical concepts related to antenna configuration, data models, line of sight surveys, and pole calculations to executive leadership to highlight the bottom line up front for deployment via PowerPoint presentations.
- Coached, mentored, and motivated junior project team members and contractors through the influence of positive action and accountability for their assigned work.
- Strategically managed the RFP and RFI efforts for the Energy business unit to win competitive municipality and utility awards valued over \$10M to deepen company experience within PLTE utility sector.
- Cultivated business relationships with internal and external partners vital to the utility programs' success.

COX COMMUNICATIONS (MAY 2021 – MAY 2022)

Construction Supervisor of California, Outside Plant Maintenance & Engineering | San Diego CA

- Successfully managed twelve (12) linemen and support staff reporting in the California region by exceeding regional metrics as the single highest-performing team in the West for 2021.
- Conducted planning and budgeting activities with a managed capital budget of \$1M for the 2021-2022 fiscal year.
- Regularly leveraged SAP to aggregate team performance data in preparation for PowerPoint presentations to the Regional Vice-President on compliance program updates, risks, opportunities and field challenges.
- Efficiently monitored resource allocations and performed needs analysis based on master scheduling to maintain planned compliance activities while adhering to federal labor law requirements.
- Encouraged direct reports' career development through mentorships, coaching, and cross-training opportunities.
- Timely managed payroll, overtime, and on-call schedule rotations while balancing resource management priorities and emergency work.
- Effectively developed four (4) business processes for construction maintenance and auditing to meet state and internal regulatory compliance guidelines.
- Thoughtfully evaluated safe work practices daily and conducted monthly quality audits and tool/truck inspections in accordance with OSHA, ANSI, and internal requirements.
- Skillfully recruited, interviewed personnel, and oversaw training readiness for deployment of new employees on the team.
- Actively monitored employee performance, provided actionable feedback, and awarded promotions and raises based on performance.

BOOZ ALLEN HAMILTON (SEP 2019 – MAY 2021) – Secret Clearance Obtained – Currently Inactive

Project Manager, Navy-Marine Corp Account | San Diego CA

(GPNTS Program)

- Collaborated with program-wide cross-functional teams in support of program deliverables, while adhering to statements of work, budget constraints and scheduling milestones.
- Effectively communicated technical/contract program updates during monthly directorate meetings to Navy Program leadership via PowerPoint presentations addressing contract modifications, task orders, software release challenges, and mitigation efforts as proposed by contractors Raytheon, Micro USA, and Sechan Electronics.
- Successfully maintained fleet schedules for critical GPNTS deployments on behalf of the warfighter worldwide.
- Collaborated with the Foreign Military Sales (FMS) project team to prepare critical reports for fleetwide GPNTS installations including equipment and technical delays.
- Leveraged Jira and Confluence to maintain task orders, contract modifications and SOP's updates, and RFI communications.
- Managed three engineering (3) indefinite-delivery/indefinite-quantity (IDIQ) contracts including modifications, source selection process, independent government cost estimates, and task orders on behalf of the United States Navy with a duration of five years, valued at \$100M+. Large-scale project covering several armed forces and agencies.
- Participated in pre-award efforts, drafting requests for proposals (RFPs) for solicitation of navigation variant prototypes in accordance with the FAR/DFARs/NMCARs.
- Collaborated with Defense Microelectronics Activity (DMEA) agency to perform contract actions in support of Micro USA/Sechan hardware development contract for a global positioning, navigation and timing service (GPNTS) prototype on behalf of the Coast Guard. Partnered to introduce a new contract vehicle to the GPNTS program via the Other Transaction Authority (OTA) valued at \$5M for three years.
- Documented vendor performance for reporting in the Contractor Performance Assessment Reporting System (CPARS) upon approval from Assistant Program Manager (APM).
- Managed task orders, created military interdepartmental purchase requests (MIPRs) on a five (5) year GPNTS Raytheon software support contract valued at \$61.5M.
- Managed task orders, contract modifications, contract data requirements lists for deliverables regarding the Army variant for the GPNTS contract, with vendor Mayflower, valued at \$6.5M.
- Collaborated with senior program leadership of each vendor/contractor to gather agenda items, for facilitation of the Integrated Product Team meetings with cross-functional teams.
- Facilitated monthly Program Management Review meetings with each vendor to allow cross-functional teams to communicate updates, program risks, testing delays, etc. to Navy leadership.

Lynette Wilson, PMP, PMI-ACP
E-Mail: lynettewilson1@yahoo.com

- Actively managed weekly program meetings to obtain status updates from the security team regarding SSP updates, code updates, software releases, upgrades, and other artifacts in compliance with contract deliverables.
- Effectively managed program meetings to address Risk Mitigation and Vulnerability Management in accordance with NIST 800-37, NIST 800-39, and NIST 800-53.

SAN DIEGO GAS & ELECTRIC (SEP 2015 – FEB 2019)

Technical Agile/Scrum Project Manager – Project Management | San Diego, CA (Nov 2017 – Feb 2019)

- Facilitated programmatic work with cross-functional teams across Southern California.
- Collaborated with the VP of Engineering (Product Owner) and Senior IT Program Manager to refine and prioritize backlog items for a \$50M enterprise-wide SAP system cutover from legacy systems.
- Effectively presented PowerPoint decks on program status, risks and opportunities bi-weekly to executive leadership.
- Partnered with SAP architects to translate business needs into technical user stories across multiple departments including Finance, Asset Protection, Gas/Electric Ops, Construction, and Metering.
- Managed user stories and acceptance criteria in Jira, ensuring alignment with sprint objectives and system integration milestones.
- Facilitated daily scrum stand-ups with a team of 20 developers to track task progress, address blockers, and maintain sprint momentum.
- Efficiently developed user stories in preparation for sprint planning activities.
- Conducted sprint planning, reviews, and retrospectives, and maintained burndown, velocity, and defect tracking dashboards via Jira.
- Led over 200 sprint deliveries, ensuring cross-functional deliverables were met on time and within budget across DevOps, QA, and engineering teams.
- Drove backlog grooming sessions in collaboration with SAP architects, software engineers, DevOps, and QA to clarify priorities and mitigate delivery risks.
- Built and maintained advanced Power BI dashboards to report on operational metrics, including safety incidents, field outages, and compliance tracking for executive stakeholders.
- Supported infrastructure scope changes by coordinating developer capacity and technical requirements to mitigate delays and promote on-time delivery.
- Liaised between business users and technical teams to ensure clear understanding of sprint goals, priorities, and system constraints.
- Advised on privacy compliance and risk management protocols for the Customer Assistance Program overhaul, supporting mobile and web interface upgrades and clearer application criteria communication.

Program Manager – Construction and Operations | San Diego, CA (Sep 2015 – Nov 2017)

- Successfully managed one out of five electric regional operations' corrective maintenance programs. This included project management, employee development, training, audit compliance, and risk management. Medium-scale project for one operating district.
- Competently managed scheduling and resource allocation for union inspectors to successfully complete corrective maintenance work.
- Directed cross-functional work between construction, engineering, compliance and regulatory to ensure adherence to program goals, requirements and budget constraints.
- Led with empathy and encouraged all four (4) direct reports to develop professional and personal goals. Two (2) of my former direct reports went on to leadership positions in two (2) different departments upon my recommendation.
- Expertly managed one hundred (100) distribution overhead and underground projects simultaneously from initiation through the close-out phase, utilizing the waterfall method. Project durations varied anywhere from three (3) to twelve (12) months with numerous levels of complexity.
- Routinely managed budgets of \$100,000+ per project, with an annual district capital budget of \$5,000,000. Worked with an assigned accountant to my operating district to ensure capital entries and non-capex allocations were tracked correctly for proper monthly and annual reconciliation.
- Efficiently developed an operations assistant's program curriculum in 2016 for onboarding and familiarizing twelve (12) new assistants into the operating districts enterprise wide. This program is still in effect today.
- Effectively leveraged relationships with senior leadership in four other operating districts to refine and streamline operations related to resource allocation and fire mitigation response. Safely collaborated with other districts to

leverage workforce dispatch for routine and fire patrols.

- Adeptly managed risk through quarterly internal policy and record audits for utility linemen and electric construction supervisors in my operating district. Made recommendations based on risk assessment findings. Implementation of recommendations led to two successful biennial California Public Utilities Commission audits between 2016 and 2018.
- Strategized with the data analytics team to develop and deploy Power BI reporting dashboard for senior leadership to track key performance indicators for each district, including monthly/quarterly budget burn-down, production forecasts, project risks, etc.
- Performed data analysis of key performance indicators from SAP reporting to implement process improvements, such as digital cutover from paper processes for dashboard roll-up and audit and compliance reporting.
- Proficiently leveraged SAP for program-level management and other ad-hoc reporting.
